## Urology

How do the body-fluids flow? Where are the weak points that cause problems in the urogenital tract and how can we counteract these problems? For the topics listed above, Radha gives us the theory, points matching the TCM diagnosis and further treatment suggestions. But also here, a good diagnosis – Radha-style- has absolute priority:

What is it this time? Reduced kidney yin, kidney qi, kidney yang? Or too much of something? Does this exist in the two water organs – kidney and bladder? Of course we do not only talk about kidney and bladder, as we never would in TCM-Praxis!

If you don't have a diagnosis, you can't make a decision; if you have an incorrect diagnosis, the decision can be fatal. Likewise, if one delays a diagnosis. Once again, TCM shows us how systematically we can initiate the investigation of problems in the urogenital tract in order to arrive at a TCM diagnosis, which can often lead to further clarifications of a Western Diagnosis. Let's start for better health!

Dr. med.  
Radha Thambirajah

graduated from Shanghai Medical College in 1970. She studied Medicine and specialised in Acupuncture. After her internship in China, she returned to Sri Lanka where she established her practice. She founded the Academy of Chinese Acupuncture in Sri Lanka in 1980, and trained doctors and health professionals all over the world. In 1984, she moved to England following the communal problems in Sri Lanka. She opened the Academy in Berlin, and to date, the Academy has trained over 9000 students worldwide. She lectures acupuncture in Europe for over 20 years. She does regular courses for the Forschungsgruppe Akupunktur in Germany, and is a visiting lecturer for number of teaching organisations in Germany, Switzerland, Greece, Poland and Barcelona. Radha practices in Sutton Coldfield, West Midlands. Her first book, 'Energetics in Acupuncture' has been published in German and English. Radha follows the Chinese style of teaching with the 'hands-on' method and lot of practice. Courses are lively and interactive. Learning Acupuncture should be fun and enjoyable and create confidence in the learner!
